

JAMES STEVENS

SOFTWARE ENGINEER

Dallas, TX | james@james-stevens.dev

www.james-stevens.dev | github.com/jas812000

PROFILE

Software engineer with hands-on experience building Java, C#/.NET, and Python applications backed by relational databases. Experienced in backend and full-stack development, object-oriented design, automated testing, secure development, and CI/CD workflows. Focused on building reliable, maintainable software through sound engineering practices, thoughtful application design, and continuous improvement. Interested in contributing to backend and enterprise application development while continuing to grow as a software engineer.

TECHNICAL SKILLS

Programming Languages: Java | C# | Python | SQL | JavaScript

Frameworks & Web: Spring Boot | ASP.NET MVC | .NET Framework | Entity Framework 6 | React | Flask | REST APIs

Databases: PostgreSQL | SQL Server | Oracle | Relational Database Design

Testing & Quality: JUnit | Jest | React Testing Library | Playwright | Selenium | SpotBugs | PMD | Checkstyle | OWASP Dependency-Check

DevOps & Tools: Git | GitHub | Azure DevOps | GitHub Actions | CI/CD | Docker | Maven | Postman

Software Engineering: Object-Oriented Design | MVC Architecture | Authentication & Authorization | Secure Development | Agile/Scrum | Code Review

PROFESSIONAL EXPERIENCE

Software Developer – Internship | May 2024 – March 2026

University of Maryland Global Campus | Adelphi, MD

- Developed and executed 45+ JUnit tests covering more than 90% of business-critical logic across 10 Java classes, reducing pre-release defects by 60% and improving software reliability.
- Implemented automated software quality and security enforcement for the CareConnect capstone, integrating SpotBugs, PMD, Checkstyle, and OWASP Dependency-Check into local development workflows and CI pipelines.
- Designed and enforced CI/CD quality gates using GitHub Actions to block builds, merges, and deployments when automated tests or security checks failed.
- Developed 12+ Java model classes using object-oriented design, inheritance, and encapsulation to support real-time pricing, customer transactions, and management of 100+ inventory items.
- Designed an Oracle relational database with six entities, 30+ attributes, views, triggers, sequences, and indexes; automated three SQL reports, reducing manual reporting time by 75%.

Medical Support Specialist | June 2023 – June 2024

BioLife Plasma Services | Dallas, TX

- Improved operational efficiency by streamlining incident reporting and first-aid tracking, reducing response times by 10% through structured workflows and standardized documentation.
- Reduced investigation resolution time by 20% by leading Post Donation Information (PDI) case reviews and optimizing data collection, improving traceability in compliance workflows.
- Implemented pandemic protocols in collaboration with EHS teams, integrating risk-mitigation practices into daily operations and increasing compliance reporting accuracy by 25%.

Software Developer – Internship | May 2022 – December 2023

University of Maryland Global Campus | Adelphi, MD

- Led testing and integration across 8+ Java modules, resolving 10+ merge conflicts and logic defects while coordinating team contributions toward successful application delivery.
- Refactored a monolithic Python/Flask application using Flask Blueprints to improve modularity, reducing merge conflicts by 50% across a three-person development team.
- Developed a multi-page Python/Flask web application with 10+ dynamic views and reusable Jinja2 templates, reducing navigation time by 35% and static content duplication by 40%.
- Implemented registration, login, and session-management workflows across 8+ Flask routes, improving onboarding success by 40% while protecting authenticated views from unauthorized access.
- Implemented custom password and form-validation logic, reducing registration errors by 90% and improving data consistency across user workflows.

SELECTED PROJECTS

JamesPetBoarding / Paws & Reservations, LLC

C# | ASP.NET MVC 5 | .NET Framework | Entity Framework 6 | SQL Server | ASP.NET Identity

- Developed a full-stack pet boarding management application using C#, ASP.NET MVC 5, Entity Framework 6, and SQL Server, with workflows for customers, pets, employees, boarding reservations, invoicing, payments, and operational reporting.
- Designed boarding, invoicing, and payment workflows with validation and business rules for check-in/out, cancellations, transaction voiding, and record deactivation/reactivation.
- Implemented ASP.NET Identity authentication, account recovery, employee registration, and role-based authorization to control access by employee role and account status.
- Built reporting and administrative capabilities including operational and financial reports, PDF exports, dashboard routing, search/filtering, and email-enabled account-security workflows.

EDUCATION & TRAINING

Master of Science, Information Technology – Software Engineering

University of Maryland Global Campus, Adelphi, MD | March 2026

Bachelor of Science, Computer Science

University of Maryland Global Campus, Adelphi, MD | December 2023

Bachelor of Science, Nursing

University of Maryland School of Nursing, Baltimore, MD | December 2010
